

Hi there,

In our family, we love big, laugh a lot, are thankful, always do our best, say sorry, try to do better in the future, have fun, and Trust God with all our hearts.

We have been married for more than ten years and met each other through a mutual friend by chance. Almost two and a half years later we were married. We enjoy going on date nights, going out to eat, traveling, and spending time with our family and friends. We are excited to become parents again and share our traditions and make new ones. Being parents was always our plan but God's plan for us was bigger. We found out we are unable to conceive biological kids two years after we got married. We adopted our daughter Adrienne in 2013 and would love to grow our family through adoption again and share our adventures and blessings with another child.

Ken is laid back, caring, helpful, and compassionate. Ken, is technical so being a computer engineer suits him well. His top priority is his family. Ken enjoys playing golf and working out. Angela is an outgoing, sweet, loving, and giving person. She is always willing to help others and is very supportive. While Angela graduated with a Bachelor's degree in Psychology she loves being a stay at home mom. Angela enjoys reading, journaling and doing crafts. She has fun by making each season and holiday magical by doing crafts, baking, decorating, and having fun. Adrienne is a fun loving little girl who has been asking for a brother or sister since she could talk. She loves playing with legos and her dolls. Dress up and accessorizing is also a must!

Family is truly what makes us the happiest. We eat dinner each night together. We love spending time together playing games, going on hikes, bike rides, having dance parties, etc. We feel our child is only this young once so we do our best to soak it (both the good and bad) in. We go to animal attractions, children's museum, story times and much more, regularly.

Adoption has always been a part of our extended family. Five of our 1st cousins are adopted. We have some amazing friends that have also adopted that we are able to share life with. We are immeasurably blessed and surrounded by love and support. They are generous and kind people that we feel supported by as we journey through life together.

We live in a large suburb though it feels like we're in the country. We're at the end of a dead end street surrounded by woods in a four bedroom, two story colonial house. We are close to everything imaginable. Our school district is rated at the top. We have a subdivision picnic every year complete with a BBQ and bounce house for the kids.

We hope that learning about our lives, together, and as individuals will help you on your own journey. We look forward to seeing what God has in store. We are humbled at the opportunity to adopt again. Should you be interested we would like to start by sending pictures and letters, and possibly build from there. Should you decide you would like no contact we respect your decision. Our hearts are open, and we promise to instill a home full of love, support, and happiness. We will be a guiding example of how to love and be loved. Most importantly, we will ensure that our child will grow up knowing the story of his or her birth, and the truth of their birth mother's love that brought us all together. We cannot wait to show another child all the love that we have to offer and all of the amazing experiences that life can bring. Thank you for considering us.

Love,
Ken, Angela and Adrienne
